

CASE STUDY · #05-AB

Balneario Aguas Blancas

Refurbishment of a 1912 spa with continuous Alba surfaces, freestanding Monolito washbasins and Forma sanitaryware in intensive-use changing rooms.

TYPE	LOCATION
Hospitality	Alcor Valley, Castellón
YEAR	PROJECT FIGURES
2023	3.200 m ² Vaults, rooms and changing rooms

The project preserves the original vaults and clothes them in light with Sal Marina porcelain in 60×120 cm format, whose lime texture converses with the historic renders.

The treatment rooms incorporate freestanding Monolito washbasins in satin ivory, chosen for their corner-free cleaning and resistance to steam and saline water.

The changing rooms, with more than 600 uses a day, were fitted with rimless Forma toilets and bidets and Dune Stone R11 floors.

PROJECT BRIEF	
Walls	Sal Marina 60×120 · Natural
Washbasins	Monolito freestanding · Satin ivory
Changing rooms	Forma WC and bidet · Dune Stone R11
Protection	Listed building, reversible intervention

PROJECT FIGURES	
Refurbished surface	3.200 m ² — Vaults, rooms and changing rooms
Daily uses	600+ — Public changing rooms

PRODUCTS USED	
- Sal Marina (VN-TL-121) — The texture of lime render in rectified porcelain. - Monolito Freestanding Washbasin (VN-BS-620) — Single-piece composite column, no corners. - Forma Wall-Hung WC (VN-WC-880) — Rimless, vortex flush and slimline seat. - Forma Wall-Hung Bidet (VN-WC-882) — The companion to the Forma WC, with the same line and fixing. - Dune Stone (VN-TL-114) — Limestone relief with sand ripples, R11 anti-slip.
