

CASE STUDY · #01-SM

Hotel Sal Marina

128 seafront guest rooms clad in Caldera Ivory slab with bespoke Ovalis washbasins on monolithic vanities.

TYPE	LOCATION
Hospitality	Cala Serena, Mallorca
YEAR	PROJECT FIGURES
2024	11.400 m ² Walls and floors

The studio wanted a bathroom with no visible joints that evoked the island's limestone coves. Caldera Ivory slab in 120×280 cm was installed on shower walls and splashbacks, with mitred corners.

The Ovalis washbasins, in the 65 cm Grande Suite version, were manufactured with an offset drain to integrate the Linea wall-mounted mixer in brushed bronze.

Common areas and the spa use textured Dune Stone porcelain in 60×120 cm format, with R11 class on the edges of the indoor pool.

PROJECT BRIEF	
Feature surface	Caldera Ivory 120×280 · 6 mm · Natural
Common area flooring	Dune Stone 60×120 · Textured R11
Taps	Linea wall-mounted · Brushed bronze
Construction period	14 months, phased deliveries

PROJECT FIGURES	
Installed surface	11.400 m ² — Walls and floors
Bespoke washbasins	256 — Ovalis Grande Suite

PRODUCTS USED	
- Caldera Ivory (VN-SL-401) — Vein-cut travertine in large format, warm and continuous. - Ovalis Washbasin (VN-BS-602) — Oval vessel in satin composite, 12 mm rim. - Dune Stone (VN-TL-114) — Limestone relief with sand ripples, R11 anti-slip. - Linea Wall-Mounted Basin Mixer (VN-AC-110) — 210 mm spout and cylindrical lever, wall-concealed.
