

CASE STUDY · #03-TM

Torre Meridiana

Four-storey public atrium with an Alba Statuario ventilated façade and 18,000 m² of high-traffic Dune Stone flooring.

TYPE	LOCATION
Commercial & public	Meridiana District, Puerto Albar
YEAR	PROJECT FIGURES
2022	18.000 m² Atrium and office flooring

The atrium receives overhead light through skylights running its entire length. The 6 mm Alba Statuario slabs, anchored in a ventilated façade system, reflect that light towards the walkways.

Dune Stone flooring in 120×120 cm was selected for its abrasion resistance and R10 class in the natural finish, suitable for more than 4,000 people a day.

The building's 80 washrooms were fitted with rimless Forma toilets and Aria cisterns with matte black flush plates.

PROJECT BRIEF	
Interior façade	Alba Statuario 120×280 · 6 mm · Ventilated system
Flooring	Dune Stone 120×120 · Natural R10
Sanitaryware	Forma wall-hung · Aria matte black
Total area	42,000 m² built

PROJECT FIGURES	
High-traffic surface	18.000 m² — Atrium and office flooring
Washrooms fitted	80 — Forma + Aria

PRODUCTS USED	
- Alba Statuario (VN-SL-412) — Warm white with a soft grey vein, dawn light. - Dune Stone (VN-TL-114) — Limestone relief with sand ripples, R11 anti-slip. - Forma Wall-Hung WC (VN-WC-880) — Rimless, vortex flush and slimline seat. - Aria Concealed Cistern & Flush Plate (VN-WC-901) — Self-supporting frame and metal flush plate in three finishes.
