| TYPE               | LOCATION                                 |
| Private residences | Roquemar Bay, Costa Blanca               |
| YEAR               | PROJECT FIGURES                          |
| 2024               | 640 m <sup>2</sup> Interior and terraces |

The architecture of courtyards and lattices called for a clay colour that would age well under the sun. Tierra Ocre slab was used for the continuous living room floor and the outdoor kitchen worktop.

The indoor kitchen revives the small format with Arcilla 20×20 porcelain in natural finish, laid with a minimal joint.

In the bathrooms, Rondo washbasins in satin terracotta converse with Linea taps in brushed bronze and Sal Marina porcelain on the walls.

| PROJECT BRIEF     |                                       |
|-------------------|---------------------------------------|
| Living room floor | Tierra Ocre 120×120 · Natural         |
| Kitchen           | Arcilla 20×20 · Natural               |
| Terrace           | Tierra Ocre 60×120 · 20 mm · Textured |
| Bathrooms         | Rondo terracotta · Sal Marina 60×120  |

| PROJECT FIGURES |                                            |
|-----------------|--------------------------------------------|
| Surface         | 640 m <sup>2</sup> — Interior and terraces |
| 20×20 pieces    | 3.800 — Arcilla porcelain                  |

| PRODUCTS USED                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |
